Summary

Target will be found in a structure on land. I sensed an open, flat and also hilly environment. Target seems to be in a fenced area. Fluid aspects plays a role, too. Brown, yellowish, dark and silver colors appears at site. Place sounds were edgy. Tactiles were metallic, shiny, muddy, smooth and ruffled.

Sketch #1 shows first impressions of the landscape profile.

Sketch #2 a kind of tube, metallic, roundish, big and a bit.

Sketch #3 a red white soft structure, i declared here an adult pillow.

Sketch #4 a morphed sketch to the landscape, another angle like in Sketch #1. A kind of building seems to be near there.

Sketch #5 a metallic structure with several repeating small metallic aspects.

Sketch #6, i sensed a plane area, fenced and hilly in the background.

Sketch #7 a tube like metallic structure again.

On site could have Debris, metal, a person and a camera. I sensed fear, loneliness, scare and fear at site. Like a person is fleeing, running away, climbed over a fence, a protected area and is hiding there in a kind of tube. A building seems to be near ~~site~~ location.
